Module 4 Quiz

Latest Submission Grade 100%

1. Which of the following are supported in SQL when dealing with strings? (Select all that apply)

1 / 1 point

- ☒ Trim
- ✔ Correct

See the video entitled, " Working with Text Strings" for more information.
- ☒ Lower
- ✔ Correct

See the video entitled, " Working with Text Strings" for more information.
- ☒ Concatenate
- ✔ Correct

See the video entitled, " Working with Text Strings" for more information.
- ☒ Upper
- ✔ Correct

See the video entitled, " Working with Text Strings" for more information.
- ☒ Substring
- ✔ Correct

See the video entitled, " Working with Text Strings" for more information.

2. What will the result of the following statement be?

1 / 1 point

```
1  SELECT SUBSTR('You are beautiful.', 3);
```

- ☐ You are beautiful.
- ☐ beautiful.
- ☐ This will return an error
- ☒ u are beautiful.
- ✔ Correct

See the video entitled, "Working with Text Strings" for more information.

3. What are the results of the following query?

1 / 1 point

```
1  select * orders
2  where order_date = '2017-07-15'
3
```

- Additional information:
- Orders = integer
 - Order_date = datetime
- ☐ You will get all the orders with an order date of 2017-07-15.
- ☐ You will get all of the orders.
- ☒ You won't get any results.
- ✔ Correct

This query is missing a from statement, so it won't know where to pull the orders from and you'll get an error. See the videos entitled, "Working with Text Strings" and "Working with Date and Time Strings" for more information.

4. Case statements can only be used for which of the following statements (select all that apply)?

1 / 1 point

- ☒ Update
- ✔ Correct

See the video entitled, "Case Statements" for more information.
- ☒ Insert
- ✔ Correct

See the video entitled, "Case Statements" for more information.
- ☒ Delete
- ✔ Correct

See the video entitled, "Case Statements" for more information.
- ☒ Select
- ✔ Correct

See the video entitled, "Case Statements" for more information.

5. Which of the following is FALSE regarding views?

1 / 1 point

- ☒ Views will remain after the database connection has ended
- ☐ Views are stored in a query
- ☐ Views can be used to encapsulate queries
- ✔ Correct

See the video entitled, "Views" for more information.

6. You are only allowed to have one condition in a case statement. True or false?

1 / 1 point

- ☐ True
- ☒ False
- ✔ Correct

See the video entitled, " Case Statements" for more information.

7. Select the correct SQL syntax for creating a view.

1 / 1 point

1

INSERT VIEW customers AS

2

Select *

3

FROM customers

4

WHERE Name LIKE '%I'

5

1

CREATE VIEW

2

customers AS

3

SELECT *

4

FROM customers

5

WHERE Name LIKE '%I'

6

1

CREATE VIEW AS

2

SELECT *

3

FROM customers

4

WHERE Name LIKE '%I'

5

Correct

See the video entitled, "Views" for more information.

8. Profiling data is helpful for which of the following? (Select all that apply)

1 / 1 point

- Joining tables together
- Filter out unwanted data elements
- Correct

See the video entitled, "Data Governance and Profiling" for more information.
- Understanding your data
- Correct

See the video entitled, "Data Governance and Profiling" for more information.

9. What is the most important step before beginning to write queries?

1 / 1 point

- Deciding what tables you want to join
- Deciding what should be done on the client application vs the RDMS
- Understanding your data
- Correct

See the 2-part video entitled, "Using SQL for Data Science" for more information.

10. When debugging a query, what should you always remember to do first?

1 / 1 point

- Start with the inner most query
- Start by examining the joins
- Make sure you didn't miss any commas.
- Start simple and break it down first
- Correct

See the 2-part video entitled, "Using SQL for Data Science" for more information.
